

Let'er Buck Bronze

The pedestal for the bronze has been installed. Located below, you can view the steel braces around the bench of the pedestal. The steel braces are to reduce skateboarding around the bench of the base. In the future, the base of the pedestal will be wrapped with brick. At the top of the pedestal, there are lights to illuminate the bronze.

The bronze will be 18' tall from the base (which is 5' tall) to the tip of his extended hand. The bronze will have a traditional patina and be completed and installed in the spring of 2010. The artist of the bronze is Austin Barton. He has done many different sculptures before. You can view his previous work at http://www.kellysgalleryatjoseph.com/artists/barton/austin_barton.html
